The type mask is a layer that allows you to apply different fonts in different locations of your document. So, if you have a document you have several paragraphs and each paragraph does not have a corresponding paragraph style, you can apply several different fonts to each paragraph as if it has a proper paragraph style. The Fill tool, formerly the Paint Bucket tool, can be used to fill any solid area with the color of your choice. It's great for solid backgrounds or coloring large areas.
